kinective

CFM · NXTsoft · IMM/eSign

Simplify access to technology to compete and better serve your communities.

Kinective is the most open and connected banking operations platform that integrates all the systems, software, and hardware directly to your core so you can deliver exceptional client experiences.

As the largest provider of connectivity for both digital and branch channels, Kinective is the force multiplier for helping you compete in today's modern world.

**80+** fintech & hardware integrations

25+ core integrations

1 out of every 4 FIs partner with Kinective

100% focused on banking

To thrive in today's modern, digitally-focused world, bankers need integrated technology to scale transformation efforts quickly and securely. Access true choice and freedom with the largest library of turnkey, fintech solutions directly integrated to your core.

Significantly automate internal business processes, digitize entire document workflows, close transactions faster, and transform the way documents flow across your institution with the only enterprise eSignature workflow platform made exclusively for financial institutions.

Circular diagram

DIGITAL CONNECTIVITY — L.O.S., Account Opening, Call Center, Back Office

DOCUMENT WORKFLOW — eSignatures, Workflows, Archival, Storage

BRANCH AUTOMATION — Cash Recyclers, Peripherals, Teller Interface, eReceipts

DECISIONS — Data Insights

RISK & COMPLIANCE — ALM, Error Mitigation

CORE

You invest millions of dollars in technology, people, and services each year, but do you know how those investments are performing? Drive actionable insights from transactional data across your entire technology fleet to make data-riven decisions on purchasing, deploying, and maintaining branch hardware.

Measure and manage risk while maximizing profit with our enterprise-level interest rate risk management, reporting, and data conversion suite.

If your people are your most important asset, then why are they wasting time on repetitive tasks instead of enhancing client experiences? Connect the hardware you need to run a modern branch directly to your core to optimize efficiency, balancing, and staff performance.

Discover the **most comprehensive connectivity suite** in banking. ⟶

Meet **Kinective's** solutions.

Our unique suite of solutions enable better financial choice and access—**for everyone.** Say goodbye to legacy cores and infrastructures. Break through limited choice of core-integrated solutions. Reduce escalated costs from inefficient processes. And remove the stress of lacking internal resources to compete with the big banks. **Our suite of connectivity solutions for both digital and branch channels empowers you to deliver exceptional client experiences.**

BRANCH AUTOMATION

Link — Branch Automation **Link** automates balancing and reconciles transactions in real-time by connecting your cash handling hardware directly to your core. *(Formerly S4)*

Hub — Branch Automation **Hub** connects your branch peripherals to your core and keeps your machines running in case of network outages. *(Formerly NORM)*

Access — Branch Automation **Access** creates hardware sharing capabilities and empowers any staff member to securely process transactions to cash handling hardware from any workstation in the branch. *(Formerly RTA)*

Serve — Branch Automation **Serve** reduces staff onboarding time with a simplified, portable transaction interface. *(Formerly NOMADIX)*

Kiosk — Branch Automation **Kiosk** integrates self-service devices directly to your banking core with added staff visibility to monitor and assist with complex transactions. *(Formerly GENIX)*

Receipts — Branch Automation **Receipts** is an SMS text receipt and e-Signature solution to power modern drive-thru, call-center, touchless, and MFA experiences.. *(Formerly eReceipts)*

Checks — Branch Automation **Checks** is a secure on-demand check and money-order printing service that allows branch staff to immediately meet client needs. *(Formerly eChecks)*

Check21 — Branch Automation **Check21** captures check images at the teller line per the Check21 Act regulations, reducing fraud, easing balancing, and eliminating manual keying. *(Formerly eTellerCheck21)*

DOCUMENT WORKFLOW

Sign — Document Workflow **Sign** simplifies signature capture and radically transforms efficiencies with the only eSignature and document workflow solution that connects front and back office processes built exclusively for banking. *(Formerly eSign/eSignPlus)*

DIGITAL CONNECTIVITY

Lending Bridge — Digital Connectivity **Lending Bridge** automates the loan boarding process with direct integration between your loan origination system (LOS) and your core. *(Formerly Lending Connector)*

Quick Bridge — Digital Connectivity **Quick Bridge** automates the transmission of loan data to your core. *(Formerly Express Boarding Module)*

Balance Bridge — Digital Connectivity **Balance Bridge** automates the generation of general ledger entries from LOS data. *(GLO/GLA Connector)*

Document Bridge — Digital Connectivity **Document Bridge** automates the uploading and indexing of loan documents into a document imaging system. *(Formerly Document Bridge)*

DECISIONS

Insight — Decisions **Insight** shows you real-time branch technology usage, health, and cash inventory. *(Formerly iQ)*

RISK & COMPLIANCE

Migrate — Risk & Compliance **Migrate** is a data imager that effortlessly moves data for core conversions, system migrations, merger/acquisitions, or regulatory reasons. *(Formerly OmniData)*

Viewer — Risk & Compliance **Viewer** is a simple, browser-based means to search and view your migrated data without the need for 3rd party systems. *(Formerly OmniView)*

ALM — Risk & Compliance **ALM** is a comprehensive asset and liability solution suite that measures and manages risk. *(Formerly OmniLytics)*
