Kinective ReceiptsPlus™
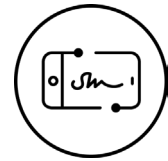

Your path to
paperless.

Generate digital receipts in real-time, making the client experience simpler and safer than ever. Kinective ReceiptsPlus removes the dependency on receipt printers and paper along with all of their associated costs by enabling clients to receive and sign through digital signature pads, electronically, or conveniently from their smartphone. **Elevate your client experience with ReceiptsPlus.**

Enhance drive-thru and
call center experiences

Capture signatures
through smartphones

Integrates with your core and
imaging systems

Why ReceiptsPlus?

Digital signatures

Consumers can sign deposits or withdrawal receipts digitally, through signature pads or tablet-based signature capture.

Efficient archiving

Generated eReceipts are automatically stored as encrypted, indexed electronic documents in your imaging/ECM system.

Offline capable

Staff can continue processing transactions in off-line mode, making it possible to give outstanding service even if the core system is unavailable.

Secure delivery

Electronic delivery is safe and secure through email or cost-effective thermal printers.

Drive-thru and call center efficiency

Enhance drive-thru and call center efficiencies for staff and clients alike.

Seamless integration

eReceiptsPlus is integrated with your core and imaging system for a seamless digital transaction experience

The retail banking landscape is more powerful when combined with digital strategies.

> " The evolution toward direct sales, self-service, digital advice, and digital payments was accelerated as a result of social distancing during the pandemic and has necessitated full scale digital adoption. "
>
> ~ Deloitte

ReceiptsPlus is an advanced digital receipt solution :

Take advantage of ReceiptsPlus capabilities, such as generating print and digital receipts, sending consumer notifications via email and text, and archiving transactions seamlessly into imaging.

ReceiptsPlus process flow

1 Core system

Directly from the teller platform, the employee initiates a receipt signing session.

2 eReceipt

Data from the teller platform automatically and seamlessly generates an electronic receipt and opens the ReceiptsPlus client.

3 User tasks

The ReceiptsPlus client provides the teller with the ability to perform additional tasks as needed.

4 eSigning

In-person and remote signing options provide signature capture solutions regardless of the situation.

5 Receipt delivery

Receipts can be printed, emailed, and/or delivered via text to the consumer.

6 Archive

Receipts and transaction information are captured in a PDF with index data and automatically delivered to any Imaging/ECM system.
