fintech product
of the year

Dealing with any of these issues in your branches?

Wasted EOD Balancing Time

Manual/Paper-Based Loan Processes

Spiraling Hardware & Staffing Costs

Benefits of Kinective's Proprietary Solutions

Access

- **One connection** that drives all cash automation devices and full feature sets (new/old/any brand) directly through DNA. Complete choice of technology!
- Optimize transaction flow with automated eSignature document generation, execution/signing, and archiving. **End-to-end connectivity!**

Functionality

- **One connection** to reduce transaction errors, automate balancing, and eSign transaction receipts.
- Run branches more efficiently with **2-3 people sharing hardware devices** while providing security, dual control, and automation of transactions.
- Automate document workflow process to **reduce the risk of human error.**

Analytics

- **One connection** to an enterprise-level business intelligence suite with clear visibility into technology performance, cash position, and credit risk.
- Documents and receipts are indexed and analyzed across all business systems to create an audit trail and **complete the transaction lifecycle.**

Now available in the **fiserv.**marketplace!

IMMeSign

Fast, easy and convenient enterprise esignature platform for consumers to complete critical business transactions, documents, and forms either in-person or remotely.

IMMeSignPlus

Embedded within the IMMeSign platform to automate back-office document procedures that will assure error-free transaction processing and increase document flow efficiency.

eReceiptsPlus

Generates digital receipts and captures real-time e-signatures via mobile device, delivers receipts to the consumer (by print, email, and/or SMS text), and archives to imaging system.

S4 NORM

Improve teller efficiency by reducing manual tasks and automating balancing through a real-time integration between cash handling hardware and DNA.

RTA

Lower hardware expenses by allowing associates to securely share transaction hardware and process cash transactions from any workstation in the branch.

iQ

A business intelligence tool that provides visibility into how your cash automation fleet is being used and performing.

What does Kinective feature that my current integrated solution does not?

kinective

Current Integrated Solution

Connected to core and teller application	✓	✓
Hardware agnostic	✓	Sometimes
Provides machine analytics and data for future deployments	✓	Sometimes
Eliminates manual balancing	✓	✗
Transactions posted in teller application/core automatically	✓	✗
Securely share hardware with other staff in the branch	✓	Sometimes
Enterprise deployment for ease of administration	✓	✗
Fully supports modern TCR features (self-audit, deplete, replenish, transit/transport cassettes)	✓	✗
Automate back office loan documentation procedures and reduce paper-based processes	✓	✗
Give clients choice in signing session options and receipt delivery (SMS text for branch and drive-thru now available!)	✓	✗
