

Kinective Insight™

Visibility is knowledge. Knowledge is power.

Making blind investments on cash recyclers and self-service kiosks can be costly. Bring clarity to purchasing, deploying, and optimizing your entire cash recycling fleet with Insight, an actionable business intelligence tool that provides visibility into how your machines are being used day-to-day.

Have you deployed the optimal amount of machines?
Are your machines holding too much cash?
Are you machines garnering the ROI you intended?
Are you seeing any machine downtime?

Is the machine even on?

View and analyze
key data across
every branch.

Optimize with
Insight

See how one financial institution leveraged Insights analytics to identify major cost avoidance and reduction in their branch network.

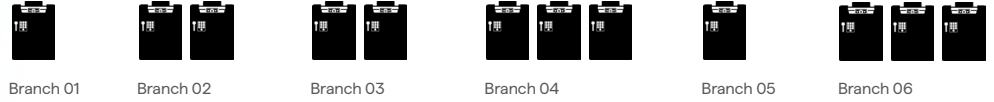

$$\left(\text{Investment} \right) + \text{Annual savings} = \text{Annual ROI}$$

$$(\$5,052) + \$172,880 = \$167,828$$

Optimize with Insight

Example branch network

6 Number of branches
12 TCRs
2X /Year each TCR pm schedule
\$3MM Targeted cash-on-hand
20% Accepted excess cash buffer

Potential Savings

(Annually)

\$35,000

Consider relocating TCR

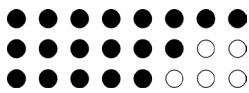

Insight identifies areas of opportunity where a less-used device at one location can be transferred to another location that needs it—rather than purchasing a brand-new machine!

\$135,000

Stay within your 20% buffer

Insight shows that this branch had an 80% buffer of cash at a peak point during this month. The Fed charged a 4.5% interest rate for this excess at the time.

20% Reduction in visits =

\$2,880

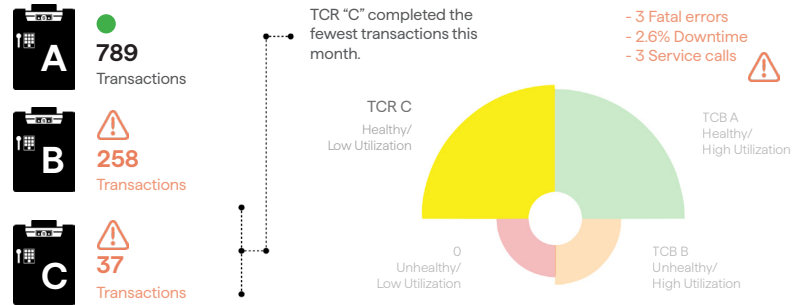

Prevent unnecessary PMs

Insight can identify that some machines are getting more or less service calls than they need, based on usage. Optimize your PM schedule based off device transaction volume, not time of year.

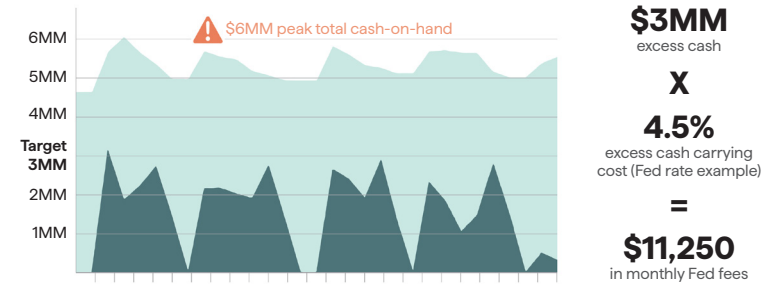

Data & Assessment

(Monthly)

Optimize TCR placement & functionality (ex: branch 04)

Optimize cash-on-hand (network wide)

Optimize preventative maintenance schedule (network wide)
